

Sustainable Development Goals

Because we aim to be an active and responsible player in our society, we have decided to participate to the Sustainable Development Goals program of UNESCO. We have committed to focus more specifically on five goals and adopt on the long run concrete actions to achieve these objectives.

Ensure healthy lives and promote well-being for all at all ages

Ensure inclusive and quality education for all and promote lifelong learning

Promote inclusive and sustainable growth, employment and decent work for all

Build resilient infrastructure, promote sustainable industrialization and foster innovation

Ensure sustainable consumption and production patterns

As of today, ArchiMed has initiated the following concrete actions:
Through its Foundation Eureka, ArchiMed is supporting since 2017 Lyon's Club House (www.clubhousefrance.org). The Club House's mission is to inform, accompany and maintain hope for patients suffering from psychical disorder who are willing to go back to work.
To accelerate its transition to zero carbon emissions, ArchiMed has partnered in 2019 with a consultant company that will be working on a project encouraging and supporting renewable energy technologies, energy efficiency, low emission transport, sustainable waste and optimized resource management.
